

# Department Expense by Vendor

Thursday, February 6, 2025

3:44 PM

To show all department expenses by Vendor?

VPO amount?

Which departments

What expenses

Meeting February 7th

Based on an extract

LedgerTransVoucher

Or

Accounting Source Explorer tmp table in Azure?

Hi Jakub, The base of this is in [AMG\_GeneralJournalAccountEntryStaging], but it needs some attention so it will give you all the required fields. What's the Prio on this ?

We have established that currently the data can be found in **Microsoft Dynamics 365** within the **Accounting Source Explorer**.

Located by navigating to the:

**General Ledger ->**

**Inquiries and reports ->**

**Accounting source explorer**

Here the team is prompted to enter criteria for analysis but the output is too vast to be analyzed here.

We have identified that the most important columns of data in our report to be included are:

- MainAccount
- Main account name(customer name)
- BusinessUnit
- CostCenter
- Brand
- SubBrand
- Amount in currency
- Party Number)ORGANIZATIONAL
- Party Name(vendor name)
- Date

**Important details to remember when analyzing the data and using it for our report:**

- Include data that does and does not include a CostCenter value.
- Focus on Vouchers beginning with "APIN"
- Brand and SubBrand should include mapping to display the associated text name description included in

Brand and SubBrand should include mapping to display the associated text name description, included in attachments.

The base of this is in [AMG\_GeneralJournalAccountEntryStaging], but it needs some attention so it will give you all the required fields.

-----  
Feb 24 8am Call with Gerard to discuss changes to the table needed(cancelled)
